## Program highlight:

The Lin Cheung Road Underpass was an integrated structure of the Express Rail Link - West Kowloon Terminus basement structure in allowing free traffic flow between Tsim Sha Tsui / West Kowloon Cultural District and Yau Ma Tei within the West Kowloon Terminus vicinity.

Due to site restraints, The underpass structure underneath Jordan Road has been constructed using "top down method" whilst remaining portions has been using "Cut and cover tunnel" method.

As the SLOW of this Major Project, the speaker wish to use his own record photographs to tell site practioners how front line Works Quality Control and Construction Safety good Practices were exercised at this XRL project during the construction period.
